Hi Jana:

I'm throwing a lot of stuff at you, none too organized – sorry about that!!

Basically, in the South Bay SMP, we want to generally update all the fields of the spreadsheet. I don't think we need quite the level of detail that is in the attached, we don't need all the contractors contact info, for example, but generally. To the extent that there is information that is in the pages before the spreadsheet, please put them in the spreadsheet format; however, we don't need all the SEMS and funding stuff. Please add one more column with EPA or state lead identified.

I have also attached the latest site assignment list, which you can use to get started. I will send out an email shortly to all the RPMs letting them know what you are doing, so that they can expect a call.

There are other south bay sites, but they are largely EPA lead. I think we should get them all on one spreadsheet, however, to look at them as a whole. I will try to develop that list and send to you before I leave tomorrow.

Questions? give me a call?

Thanks!

Regards,

Kelly Manheimer
